

Dramatically revised second edition
of a unique **full-color** reference

Color Atlas and Textbook of Diagnostic Microbiology

2nd Edition

By Elmer W. Koneman, M.D.;
Stephen D. Allen, M.D.;
V. R. Dowell, Jr., Ph.D.;
and Herbert M. Sommers, M.D.

Hundreds of sharp and detailed illustrations, most of them in full color, distinguish this unique and practical atlas/text. Succinct procedural descriptions, integrated with the illustrations, are systematically organized to follow the "flow" of work in the laboratory, providing maximum usefulness for the user. The authors describe *how* to perform the procedures routinely employed in the laboratory identification of microbial agents associated with infectious diseases, explain *why* each operation is necessary, and *what* role the laboratory plays in the overall care of patients with infectious diseases.

New features include:

- fifteen new full-color plates.
- new chapter on Legionnaires Disease, and new discussions of Chlamydiae, Campylobacter, Vibrio.
- an overview of the various packaged identification kits and automated instruments that may revolutionize the future practice of clinical microbiology.

"... takes an extremely functional and realistic approach ... covers clearly and concisely topics of major importance—from specimen collection to administrative techniques ... should never be more than an arm's reach from anyone in the clinical microbiology business."—Laboratory Management*

"The material presented is well-developed, informative, to the point, and most important, able to be understood and used at the bench level by both technicians and technologists ... This text may be used without reservation by a variety of personnel at any level."—Journal of American Medical Technology*

*All reviews of the first edition

About 650 Pages. 446 Full-Color Illustrations.
170 Black-and-White Illustrations. 2nd Edition, 1983.
65-07123. \$39.50

includes these hard-working references**

Effects of Diseases on Laboratory Tests

Jerome J. Berner, M.D. / About 350 Pages / 75 Illustrations / 1984 / 65-07438 / \$19.75

Collection and Handling of Laboratory Specimens:

A Practical Guide Edited by Jean Slockbower, Ph.D., and Thomas Blumenfeld, M.D. / About 256 Pages / About 94 Illustrations / 13 Tables / Paperback / 1983 / 65-06661 / \$10.95

A Handbook of Routine Urinalysis

Sister Laurine Graff, M.S., CLS, MT(ASCP) / About 304 Pages / 231 Full-Color Photomicrographs / 11 Black-and-White Illustrations / 8 Tables / Paperback / 1982 / 65-07321 / \$24.95

Administration and Supervision in Laboratory Medicine

Edited by John R. Snyder, M.S., MT(ASCP)SH, and Arthur L. Larsen, M.D. / 32 Contributors / 554 Pages / 141 Illustrations / 41 Tables / 1982 / 14-24159 / \$37.25

Medical Technology Review

Edited by Lorraine D. Doucet, Ph.D. / 7 Contributors / 464 Pages / 25 Illustrations / Tables and Charts / Paperback / 1981 / 65-06000 / \$15.00

Medical Technology Examination Review

Lorraine D. Doucet, CSC, Ph.D., and Albert E. Packard, B.S., MT(ASCP) / 279 Pages / 60 Illustrations / Paperback / 1979 / 65-05754 / \$15.00

Laboratory Instrumentation, 2nd Edition

Edited by M. Robert Hicks, B.S., MT(ASCP); Jerald R. Schenken, B.S., M.D.; and Mary Ann Steinrauf, B.S., MT(ASCP); with the special assistance of C. A. McWhorter, M.D. / 23 Contributors / 233 Pages / 142 Illustrations / Paperback / 2nd Edition, 1980 / 14-11917 / \$21.50

Applied Biochemistry of Clinical Disorders

Edited by Allan G. Gornall, Ph.D., D.Sc., F.R.S.C. / 25 Contributors / 544 Pages / 140 Illustrations / 1981 / 14-10109 / \$30.00

50 Diagnostic Special Stains for Surgical Pathology

Erwin Haas, B.Sc., HT(ASCP) / 189 Pages / 171 Full-Color Illustrations / 1981 / 65-06976 / \$41.50

Diagnostic Cytology and Its Histopathologic Bases,

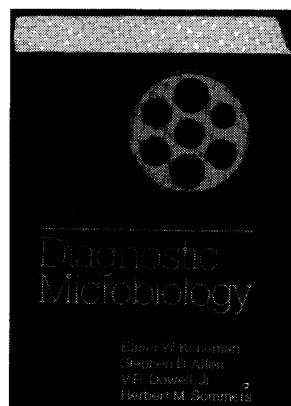

3rd Edition Leopold G. Koss, M.D. / With 8 Contributors / 2 Volumes / 1,314 Pages / 2,275 Black-and-White Illustrations / 38 Full-Color Illustrations / 3d Edition, 1979 / 65-02645 / \$137.00

Leukemia: Cytology and Cytochemistry

Lawrence Kass, M.D. / 336 Pages / 246 Black-and-White Illustrations / 28 Full-Color Illustrations / 2 Tables / 1982 / 65-06034 / \$52.50

Bone Marrow Interpretation

Lawrence Kass, M.D. / 357 Pages / 396 Illustrations / 1979 / 65-05572 / \$53.50

Comprehensive five day course designed for pathologists, nephrologists, internists and other physicians interested in a systematic review and update on advances in the diagnosis of problems encountered in medical renal diseases. The course provides an intensive review for physicians preparing for Specialty Board Examinations in Pathology and Clinical Nephrology. Clinicopathological correlations are emphasized. Program consists of lectures, panel discussions, and case presentations followed by question-and-answer sessions. Fee includes a complete syllabus, Kodachrome slides, electronmicrographs of "classic" renal lesions, luncheons and continental breakfast. Contact: DR. ELIZABETH C. GERST, Director, Continuing Education Center, 630 West 168th Street, New York, N.Y. 10032; telephone: (212) 694-3682.

Watch your investment grow.

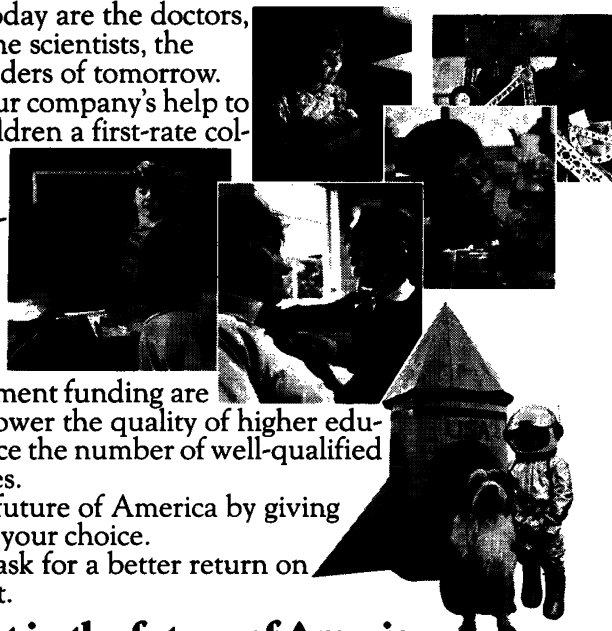

The kids of today are the doctors, the engineers, the scientists, the teachers, the leaders of tomorrow.

It will take your company's help to assure these children a first-rate college education because today colleges are having a hard time coping with the high costs of learning.

Rising costs and less government funding are threatening to lower the quality of higher education and reduce the number of well-qualified college graduates.

Invest in the future of America by giving to the college of your choice.

You couldn't ask for a better return on your investment.

A PUBLIC SERVICE OF THIS PUBLICATION
AND THE ADVERTISING COUNCIL

The new "**LEVER**" is ready! Called
"classic"... "definitive"... "standard"... "authoritative"...
it's *the* indispensable reference in its field.

6th Edition

Histopathology of the Skin

By **Walter F. Lever, M.D., and
Gundula Schaumburg-Lever, M.D.**

**Contains 486 illustrations . . .
4 plates in full color . . .
50 electron micrographs.**

For more than three decades and through five editions Lever's HISTOPATHOLOGY OF THE SKIN has been recognized as the top-ranking book in its field because it contains everything you are likely to want to know about its subject—presented clearly and concisely in highly readable style. And now, once again thoroughly revised and updated, this text—in its 6th Edition—is more than ever the source to turn to for a confirming opinion or needed information. A reviewer* of an earlier edition expressed it in a nutshell: "Every discussion of dermatologic problems will logically come to a point where someone reaches to the shelf to 'see what Lever says.'"

*Archives of Dermatology

The 6th Edition brings you up to date on the histologic findings and the histogenesis of each dermatosis. It reflects the knowledge explosion in the field, especially in the areas of research, immunology and lymphomas. A new chapter, Systemic Diseases with Cutaneous Manifestations, has been added. This new edition also includes almost one hundred dermatoses not previously described—about half of them are 'new' dermatoses that were either unknown or not fully established as entities when the 5th Edition was written; the other half are dermatoses that were already known but regarded as too rare to be included.

The text covers recent progress made in the field of diagnostic histopathology as well as advances based on the correlation of histologic and laboratory findings. Additional features include sixty-one superb new illustrations, a glossary of terms, and extensive bibliographies.

Resounding praise for earlier editions

"When Dr. Lever's book first appeared in 1949 it instantly became, and has since remained, the universal standard work on its subject . . . the book will continue to hold its place." *Journal of Clinical Pathology.*

"'Lever' will undoubtedly continue to be the bible. It should be handy on the desk of every

pathologist and dermatologist who reads skin biopsies and is required reading for dermatology residents." *The Journal of Investigative Dermatology.*

"... the only up-to-date text on histopathology of the skin in the English language . . . short discussions of clinical features and modern views on histogenesis are followed by clear and concise descriptions of histopathologic findings and differential diagnosis for all common and more rare disorders of the skin." *American Journal of Clinical Pathology.*

"... the overall quality, comprehensiveness, and extensive current bibliography again make Lever's *Histopathology of the Skin* the standard reference work for clinician and pathologist alike. Its reputation remains unchallenged by any presently available book." *Annals of Internal Medicine.*

"... an excellent textbook and reference . . . remains a classic in the field of dermal pathology." *JAMA.*

"Each subsequent edition has provided important new information . . . the sections are so beautifully presented that they will continue to be the first place to which we turn to settle difficult problems . . . deserves a place in the library of every surgeon . . ." *Plastic and Reconstructive Surgery.*

"... this excellent book fulfills all of the criteria which should be met in keeping a textbook current . . . timely and definitive." *Bulletin of the Johns Hopkins Hospital.*

DEADLINE:

First of month preceding publication month.

FORENSIC PATHOLOGIST seeks new challenge. Eighteen years case-investigative experience. Established and directed medical examiners systems for the state of Oklahoma and the District of Columbia. Strong education, training and research credentials. Local/Federal administrative skills. Sense of humor and reputation intact. East coast preferred. Part-time a possibility. **James L. Luke, M.D., 5240 Loughboro Road, NW, Washington, DC 20016, (202) 244-1660.**

THE UNIVERSITY OF CALIFORNIA, SAN FRANCISCO SCHOOL OF MEDICINE seeks and Associate Pathologist for its affiliated VA Medical Center in Fresno. Applicant should be certified in either clinical or anatomical pathology and have interests in clinical instruction and investigation. Fresno's central California location offers delightful living conditions and ready access to both mountain and coastal recreational areas. Please address inquiries and C.V.'s to **Jean Beland, M.D., Chairman, Search Committee, Department of Pathology, VA Medical Center, 2615 E. Clinton Ave., Fresno, CA 93703.** The University of California is an equal opportunity/affirmative action employer.

NEPHROPATHOLOGIST: Qualified in the morphologic and clinical correlative aspects of renal disease. Evidence of scholarly activity required. Academic rank and salary depend on qualifications. Write: **R.W. Prichard, MD, Chairman, Department of Pathology, Wake Forest University, Bowman Gray School of Medicine, Winston-Salem, NC 27103.** An equal opportunity/affirmative action employer.

DEVELOPMENTAL PATHOLOGY FELLOWSHIP — Two year program beginning July, 1984. Includes diagnosis of placental, fetal, perinatal, and pediatric pathology; forensic pediatric pathology; equal time in research. Write **Developmental Pathology Program, Section of Pathology, Box G, Brown University, Providence RI 02912.**

EXPERIMENTAL PATHOLOGIST: The Department of Pathology, University of California, San Francisco, is seeking an investigator (M.D. or Ph.D.) active in cell biology-oriented experimental pathology. Excellence in research is of prime importance. Emphasis on extracellular matrix, immunopathology, or developmental biology is encouraged. Rank and salary are open. Direct inquiries to: **Dr. Dorothy F. Bainton, Chairperson, Experimental Pathology Search Committee, Department of Pathology, University of California, San Francisco, CA 94143.** An equal opportunity/affirmative action employer.

CHIEF OF LABORATORY SERVICES

Brown University, Section of Pathology and the Veterans Administration Medical Center in Providence, RI are seeking a pathologist to fill the position of Chief of Laboratory Services at the VA Medical Center. Candidates should be Board certified in Anatomical and Clinical Pathology and have an active research program preferably in liver, pancreatic or gastrointestinal diseases. The successful candidate, who will be eligible for appointment in the Brown University Program in Medicine (associate to full professor) will be expected to develop a strong academic program in Pathology while maintaining and developing service capabilities. The Veterans Administration Medical Center is an active 347-bed, Deans Committee medical center, affiliated with the Brown University Program in Medicine.

Please send a curriculum vitae, by **November 15, 1983**, with a description of research plans and the names of three references to: **Dr. Nelson Fausto, Chairperson, Section of Pathology, Division of Biology and Medicine, Brown University, Providence, RI 02912.**

We encourage applications from women and minority candidates. Brown University and the VA Medical Center are equal opportunity/affirmative action employers.

LABORATORY COMPUTERIZATION

CONSULTING SERVICES and ON-SITE ASSISTANCE

- *Determination of Needs*
- *Vendor Selection*
- *Contract Negotiation*
- *Installation and Training*

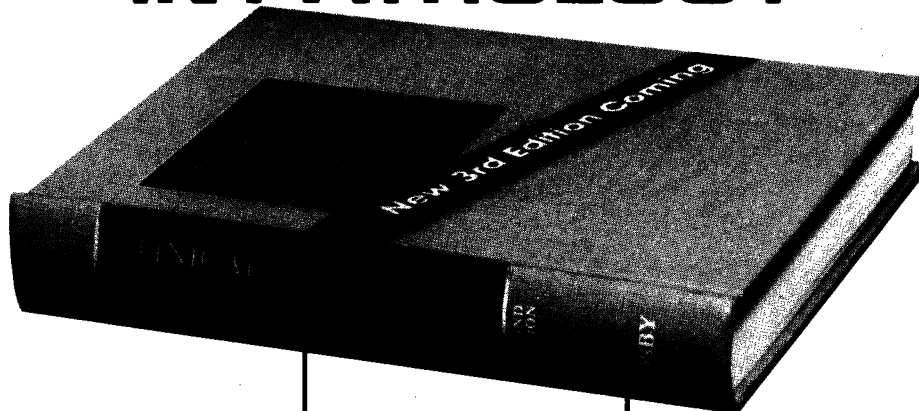

Every laboratory, large or small, can benefit from computerization. Permanent, full-time personnel are not required; only initial, expert guidance and assistance. Take advantage of ten years of experience without a long-term commitment.

UNEQUALED ADVICE IN PATHOLOGY

New 3rd Edition! **Clinical Pediatric Oncology**

Edited by Wataru W. Sutow, M.D., Donald J. Fernbach, M.D.; and Teresa J. Vietti, M.D.; with 52 contributors.

This is the new edition of the reference JAMA cited, in its review of the last edition, for "... continual preeminence as the text for pediatric oncology." Totally revised and updated to reflect advances in the field, this edition also features four new chapters, including:

- pathology — specimen processing, new diagnostic techniques, grading of tumors, and histopathologic basis for therapeutic monitoring
- bone marrow transplantation — problems, techniques, syngenic and autologous transplants
- sequelae of cancer therapy — potential aftereffects for each organ and for particular tissues

October, 1983. Approx. 800 pages, 403 illustrations. (4847-5) About \$56.95.

NEW! **Current Therapy in Hematology-Oncology 1983-1984**

Edited by Michael C. Brain, D.M., F.R.C.P., F.R.C.P.(C) and Peter B. McCulloch, M.D., F.R.C.P.(C); with 91 contributors.

- discusses bacterial, viral, and fungal infections in the compromised host
- includes medical and surgical treatment, radiation, endocrine, and transfusion therapies

1983. 342 pages. (D-0780-9) Mosby distributes this B.C. Decker Inc. publication. Price, \$44.00.

NEW! **Soft Tissue Tumors**

By Franz M. Enzinger, M.D. and Sharon W. Weiss, M.D.

- emphasizes clear, concise descriptions as a basis for differential diagnosis and prognosis
- updates the WHO classification of soft tissue tumors and details the reclassification of fibrous, vascular, and neural tumors

1983. 649 pages, 1,140 illustrations. (1499-6) Price, \$99.95.

New 7th Edition! **Blood Transfusion in Clinical Medicine**

By P.L. Mollison, M.D.

The New England Journal of Medicine called the last edition, "... one of the principal reference works for anyone interested in the field of blood transfusion." New coverage of:

- the chemistry of MNSS antigens
- modified hemoglobin, monoclonal antibodies, and much more

1982. 960 pages, 105 illustrations. (B-3477-6) Mosby distributes this Blackwell Scientific Publication. Price, \$69.95.
